SALE OF HOUSEHOLD FURNITURE.—We direct the attention of our readers to the advertisement of Messrs. Campbell, Knox & Co., who will sell, to-day, a well preserved assortment of household furniture, at No. 18 Rutledge Avenue. It is seldom that such chances are offered to the public, and we advise all who are interested in procuring good articles at reasonable rates to attend the

ARRIVAL OF THE SEAMSHIP MANHATTAN AT NEW York.—We are pleased to notice that this fine steamship of STREET BROS. & Co.'s line, which left this port on Saturday afternoon last, with the large number of one hundred and fifty passengers and a full freight, has made another fine run to New York, having arrived at that port at 11 o'clock Monday night.

THE NEW GERMAN CHURCH.—We are pleased t notice that our German Lutheran friends are not discouraged by the times. Under the guidance of their esteemed Pastor, Rev. Wm. MULLER, they are about to erect on King street, opposite Citadel Green, a noble and imposing Gothic Church. The design, which may be seen at Mr. COURTENAY'S, Broad street, is by our fellow-citizen, JOHN H. DEVEREUX. We commend the building committee for their energy and taste, but more particularly because they did not send to the North for designs. This is a"step in the right direction. If we have any talent among us, let us bring it out, and not send our young men to other cities to seek that encouragement they cannot get

UNDERTAKING BUSINESS .- It will be observed by a notice in our paper, that Mr. R. A GRATEFUL PRESENT.—Yesterday, at 12 o'clock M., we were the recipients of one of the most agreeable gifts that we remember ever to have received T. R. Tully, caterer, at No. 124 King street, selected that hour, knowing the terrible warmth of editorial offices, to send us an abundant supply of the coldest and most delicious "Pineapple Newport" and "Vanilla Cream," "Bisquet Glace" and "Frozen Peaches," and, withal, the largest quantities of delightful cakes of all kinds that have ever been served from his confectionery and bakery. It did not need a participation in these charming substances to assure us that Tully stands at the head of his profession, for we have placed him in that position long ago, from an intimate acquaintance with the style in which he conducts his art, but we here take occasion to thank him for his liberality,

A New Grocery Store.—Trade has been affected by the march of improvement, and is gradually leaving down-town for the Upper Wards. Many stores have been opened in those sections, and goods can now be purchased there as cheaply as in the more hyored localities. This is particularly noticeable in some streets which have been transformed from their former quiet to busy thoroughfares. In Spring street many new stores have been opened, but few will compare with the family grocery recently started by Mr. Wm. BROWER, at No. 31. Mr. BROWER's establishment is a little bijon, and embraces everything that the most fastidious could require. From his connection with the Northern markets, he can always obtain fresh supplies, and his customers are sure that his stock is fresh. A reference to his advertisement will convince our readers that he has studied the art High School. Adopted. of pleasing, for the delicacies he offers for sale are enough to tempt an epicure or a gourmand.

NARY DRUNK THE MAINE LAW VICTORIOUS. One good effect of the stringent law regarding har-rooms was noticed vesterday morning. The docket at the Mayor's Court was entirely bare of interest, not a single inebriate appeared, the populace were shocked into sobriety, and the andience were convinced that moral sussion was a powerful inducement to keep the wicked from slippery places. For fear the vis inertic should prove a great misfortune to the constabulary, we give them the benefit of a report from a town in Maine, showing what can be done by an energetic police, especially when backed by the United States, the following is some of the results of one

week's labor:

A cow was arrested for having "two horns."
An individual, lately deceased, was fined for being "on his bier."
A pair of boots seized for being "tight."
A horse ran away and smashed a wagon. The horse was promptly arrested, but it being proved that the "smash" contained nothing intoxicating he was acquitted.
Several "cocktails," found in the hencoop of a prominent citizen, were confiscated. The success of the police in this seizure caused much "crowing," and it will doubless. "spur" them on to increased activity.

A worthy shoemaker was seized on suspicion of being a "cobbler," but proving there was no "sherry" connected with him, was released on condition that this should be nis "last" offence. He was informed that any future dereliction would involve the confiscation of his "all."

Complaint was made that a barrel of beef was found "covered" at a grocery store. found "corned" at a grocery store.

MENDENHALL'S IMPROVED SELF-ACTING HAND Took.—One of the greatest inventions of the present day has been the MENDENHALL LOOM. Those persons who are familiar with the looms to be een throughout the country would be supprised to observe the simplicity and the power that is displayed in this loom. . It is far less cumbersome, and is indeed somewhat ornamental, while its con struction is so simple that it could be easily worked by a child of ten or twelve years. In the place of the awkward movement of the foot board s simple crank is used, and by a combination of cog wheels a powerful force is given, and all the re-

sults of a first-class loom obtained.

This loom is a Southern invention, but it was not brought before the public until the close of the war, if it had been otherwise many of the difficulties that beset us would have been obviated. One or the greatest wants of the Confederates was army clothing, and with the aid of this loom a full supply of cloth could have been obtoined. The war has ended, but the necessity for personal exertion remains the same, and every farmer who aspires to independence should procure one of these looms, and by its use he will be able to arrive at a competence. The treadle movement in this loom consists of but three pieces; it is usually the most complicated part of the machinery, but has been reduced by science to extreme simplicity. Onesixth less power is required to work it, and the short time. Those persons who have ever used the old looms will have no difficulty in learning the

change from one style of stitch to another and to the different grades of cloth can be effected in a use of the MENDENHALL patent, while others can easily acquire the necessary information. The advantages of the new loom are at once manifest; it weaves as fast as a factory loom is

worked by the turning of an easy crank, and can weave any grade of goods from a blanket or a carpet to the finest woolen, cotton or linen goods. It can be easily changed to a power loom, and is especially suited for those districts which are now endeavoring to establish manufactures.

MAYOR'S COURT, July 2 .- A colored boy who carries milk, and who got into a controversy with a boot black, which ended in a scientific display of shoe brushes and milk cans, was fined \$5, and the other boy will be polished off as soon as caught. Eleven cows, of all colors and dispositions, who were caught promenading the streets instead of confining their perambulations to the burnt district, had the pleasure of meeting their owners in open court, and of observing them pay a fine of \$1 each for their trespassing on the walks used by

Schroe-DER and WILLIAM TENNENT, Esqs., appearing for the defense. Chisolm was indicted by the Coronor's Jury for the murder of the child by drowning, and our readers will remember the account of the inquest held on that occasion. There were a number of witnesses summoned both for the State and the defense, and the examination consumed nearly the whole morning. The court adjourned at 5 P. M., and will resume the hearing of the case to-day.

I have always recommended the Faber Polygrade
Lead Pencils as the only pencils fitted for both ornamental and mathematical drawing; but, after a thorough
trial of the American Polygrade Lead Pencils, manufactured by the American Lead Pencil Company, New
York, I find them superior to any pencil in use, even to
the Faber or the old English Cumberland Lead Pencil,
being a superior pencil for sketching, ornamental and
mechanical drawing, and all the ordinary uses of a lead
pencil.

These pencils are very finely graded and have a very recent lead; even the softest pencils hold the point well, These pencies are very many grants and more well; smooth lead; even the softest pencils hold the point well; they are all that can be desired in a pencil. It gives me great pleasure to be able to assure Americans that they will no longer be compelled to depend upon Germany or any other foreign market for pencils.
